

Project Timeline

Project Proposal	5-Jan	20-Mar	74	This contains in full the reason behind the project and all of the processes that encompass it.
Documentation	16-Jan	21-Aug	217	This will a be a process of documenting all intecations and ideas associated with the project
Theorical Designing	16-Jan	25-Feb	40	This entitles the theoretical designing the entire system from start to finish based on models and diagrams
Testing/Confirming	26-Jan	20-Mar	53	This ecompasses testing all devices for optimum usage and parts for cofirmation on desired specifcations and proof of concept
Applicable Re-Design	20-Mar	3-Apr	14	This will comprise of taking the original deisgn and compiling all components into a fluid electrical system cabable accurate and function synthesis.
Simulating	27-Mar	17-Apr	21	This will ecompass building simulatable computer designs of all modules of the project and simulating their processes to deterime the bevaoir of these systems.
Constructing	10-Apr	1-May	21	This will be a process focuses on simply physically constrcuting the prototype of the system for testing and optimization
Testing/Stressing	24-Apr	8-May	14	This will consist of testing the device and stressing it to its local range of pheseable operation
Optimizing	1-May	22-May	21	This will aim at increasing that range of operation so as to make the device more effective and effceint
Reconfiguring	15-May	29-May	14	This will consist of taking the data from the testing and optimization and compiling it into a configuration which will be designed for implementation and final outcome
Implemeting	22-May	21-Aug	91	This will be the process of impelemting the newly configured design with the desired purpose of that device so as to prove effectiveness.
Improving	29-May	14-Aug	77	This will consist of taking new and improved steps at changing the newly implemented device to imporve functionality as well as user interfacing and precision
Finalizing Presentation/Documentation	29-May	21-Aug	84	This is the compliation of all data collected over the period of the project as well as the processies used inroder for presentation as to the projects effectiveness.
Final Testing/Confiruation Setup	7-Aug	21-Aug	14	This is the final testing proving effectivness for industry production and use .
